

# CCCP site features

**Automatically email or manually print out renewal or late letters from the dashboard.**

Customer renewal letter & email would reference the due date, account #, and meter #. Also include tester list or link.

Cross reference Acct #, Meter #, Serial #, Name , Address, Zip code. Could we have a search field?

**Test date default to today's date. ie 02/07/12 - DONE**

View (**DONE**) or print out individual/list of upcoming test renewal using desired parameters.

Dashboard list out all past due test. View or print out individual/list of current past due test using desired parameters.(For mailing out shut off notice)

**Curser automatically jumps to the next field throughout site.**  
**- Maybe a future version**

Dashboard list out devices being repaired. Notify the W/C Administrator of devices that failed the test and are being repaired. - **DONE**

**Send renewal email to last tester.**

**Alert by email and dashboard that action must be taken after a specified number of days past due.** Pop up and email shut off notice to water department person in charge of doing the shut off.

Test due date can be fixed date or of auto renew 12 months after last passing test date?

**Back up data to two different places.**

Survey due date and print out letters.

**Link together customer with multi devices. - DONE**

**Add a field for customer business and cell phone # and email address of appropriate person or department or both. - DONE**

The water company or I can input the new customer data fields.  
**- DONE**

**Testers that are out of compliance would have access denied.**

Tester list can be printed or (viewed - **DONE**) on the site.

Can we randomize or rotate the listing of the testers?

File must show risk level. High, Medium or Low. - **DONE**

Tester gains access to extra area to update for new devices only.  
**- DONE**

**Way to lock max number of devices for each water company.**

Import customer data into the site?

Tester must enter two fields correctly to open file, or another way to make it fool proof?

Water Company needs a way to look back at the test history for the last three test. Maybe an alert that pops up if there is a drastic change in the results from the last test?
